

NEWS RELEASE March 2009

ALARM AGREEMENT

Alert Services, the monitoring division of Securitas has teamed up with the alarms-over-IP product firm Chiron Security Communications (CSC).

Alert Services' customers can use Chiron's independent-VdS-accredited IRIS intruder alarm monitoring product. Chiron's Corporate Account Manager, Vikram Datar, said that IRIS Touch offers alarms-over-IP transmission and monitoring, including cost savings (50-70 per cent compared with conventional RedCare links, it is claimed), remote trouble-shooting, remote CCTV camera control and network resilience through constant dual-path back-up communication via PSTN, GSM or GPRS routes. Pictured: Vikram Datar with Bob Marston-Taylor, Alert Services' UK operations head.
