

## NEWS RELEASE February 2010

### Senior appointment as Chiron Security Communications prepares for major launch

As it prepares to unveil one of the most significant technology advances to-date in the IP-alarms field – the introduction of IRIS Secure Apps, expected in February 2010 - Chiron Security Communications has confirmed the appointment of Kevin Swann as Chief Operating Officer.

The company's founder, Ian Tredinnick, now becomes Chief Executive Officer, while fellow director Mike Kennedy takes on the role of Chief Technical Officer.

With more than 30 years in the industry, Kevin Swann joins Chiron from the global IP software and hardware sector where he has held a number of senior posts, most recently as business - development director at Etherstack Ltd.

"This is a particularly exciting time to be joining Chiron as we are on the brink of major advances that will transform the sector," comments Mr Swann. "IRIS Secure Apps will be nothing short of a revolution for the way installers and ARCs work with IP-alarms - and it will raise the expectations of end-users to a whole new level,"

More than 100 ARCs around Europe now monitor Chiron's IRIS system, making it Europe's best selling technology, and the only dialler range in the IP alarms sector to be independently certified by VdS to EN 50131, 50136 and EN 54-21 standards.

With the development of IRIS Touch CSC is the only company to have achieved VdS certification in the IP alarms field. Customers are already buying the systems as a direct result of their new approved status, confirms CSC, with clients signing up in Switzerland, Germany and Austria.
